- Relativity (English translations, 1920 and 1950)
- General theory of Relativity (1916)
- Investigations on Theory of Brownian Movement (1926)
- The Evolution of Physics (1938)

HOBBIES

My Hobbies are sailing, reading and playing the violin and piano. I'm an avid musician, particularly fond of playing the violin, which I consider as a source of joy. I also enjoy sailing, embracing the solitude and the mental respite itt offers. I am a voracious reader with a deep intrest in philosophy.

"Logic will get you from A to B. Imagination will take you everywhere"~Albert Einstein
